PROJECTS

1. Real-time Digital Clock Application :

Link: <https://github.com/AnkitSoni03/Digital-Clock>

The approach is to use the date object to get time on every second and then re-rendering time on the browser using the new time that we got by calling the same function each second.

Tech stack - HTML, CSS, JavaScript, API .

2. Live Weather Tracker:

Link: <https://github.com/AnkitSoni03/Weather-App>

Created a web based app which shows the live weather report of entered cities. I have used the **OpenWeatherApp API** to collect the data for the weather report.

Tech stack - HTML, CSS,

JavaScript , API .
